

CAMPFIRE CONNECTION MINISTRIES

Our Purpose

Our purpose with Campfire Connection Ministries is threefold: providing adventure experiences, and offering discipleship resources. We practice out this vision through these two key partnerships

Outdoor Adventure Partnership

The Mission of Outdoor Adventures exists to provide environments, experiences, and resources which aid people, especially youth, in drawing closer to God through the ministry of Christian wilderness adventures.

Aion Path Partnership

We will be offering discipleship resources through Aion Path. This partners with dads to have intentional conversations with their middle school sons and daughters. This individual resource has 3 components of spiritual formation, tangible skills and adventures experiences that the father does with their apprentice under the guidance of fatherhood.

Our Resources

We will use adventure experiences to foster relationships and conversations to teach others more about God and spiritual growth. Being outside gives opportunities to connect with God, each other, and nature. Deepening relationships around the campfire is a great tool for growth and development!

I've written an e-book about my mountaineering experiences in high school, been writing my journey on discipleship since then and plan to merge that content and publish a book for a testimonial resource. The vision for this is a tool and framework for parents to use to engage in deeper conversations with their students.

Family Cafe to create a space to be intentional in connecting with one another, moving our bodies together, and having deeper conversations around a bonfire time in a circle setting on a rooftop deck.

The Problem

Jesus first went into the wilderness to be with God, in that time God gave him direction, identity, and mission for his public ministry. In the same way, today's fathers need the wilderness to find clarity, courage and strength for leading their families..

Fathers are in desperate need of resources to equip them to disciple their families. It is our biblical responsibility to make this our first priority. We need more leaders, not consumers!

Our Vision

Our aim is to equip & resource the next generation of leaders and the local-church with resources to solve that problem.

Impacting leaders and students with transformational wilderness experiences that lead into one-to-one discipleship relationship growth!

Giving Partners

We will be communicating through a real-time engagement tool called Viewspark that will allow you to see in real-time the stories, updates and impact of our work.
